

## Slack Instructions

- About Slack: it's an instant-messaging tool, quite popular among tech companies and start-ups. It's similar to skype/teams, free for small groups like ours, we can exchange messages (searchable), documents and even code snippets depending on the activities we'll do during the year, more details here:  
<https://slack.com/help/articles/115004071768-What-is-Slack->
- Application: You may use the web application (<https://slack.com/downloads/>) or install the software in your computers/mobile phones. Although the web application is available you may find it limited in functionality. If you install the app, make sure to turn on all notifications so you don't miss any info.
- Experience: you can check the video in this link "See how work gets done in Slack" to check how is the overall user experience with Slack. Personally, I've used it before and it's very intuitive/easy to use:
